DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following invention is required under 35 U.S.C. 121:
 - I. Claims 1-34 are drawn to organize web document content and classified in class 715, subclass 514.
 - II. Claims 35-38 are drawn to web-browsing resources access controlling and classified in class 709, subclass 229.
 - III. Claims 39 is drawn to web session/connection establishing and classified in class 709, subclass 227.
 - IV. Claim 40 is drawn to context-sensitive graphical user interface and classified in class 345, subclass 708.
 - V. Claim 41 are drawn to software platform architecture and classified in class 717, subclass 106.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, usable alone, such as the ability to organize web document content in a hierarchical control. Invention II has separate utility, usable alone, such as the ability to control web-browsing resources access. Invention III has separate utility, usable alone, such as the ability to establish web service session/connection. Invention IV has separate utility, usable alone, such as the ability to provide context-sensitive

service in graphical user interface environment. Invention V has separate utility, usable alone, such as the ability to create software application. See MPEP § 806.05(d)

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one Group is not required for other Groups (i.e. search for Groups II, III, IV, and V is not required for Group I), restriction for examination purposes as indicated is proper.
